COMMISSIONERS' NOTICE.

OFFICE OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA, Washington, Aug. 15, 1907.

Ordered: That the order of January 24, 1907, relating to the election of fire escape appliances, be hereby amended to read as follows: That the fire escapes to be installed in accordance with the act of Congress, approved March 19, 1906, entitled, "An act to require the erection of fire escapes in certain buildings in the District of Columbia, and for other purposes," as amended by act of Congress approved March 2, 1907, shall be of the type shown by drawings on file in the office of the Inspector of Buildings. In certain cases, however, hereinafter specified, chain and endless ladder types of fire escapes may be used. (2) Fire escapes must be so located that a person in any part of a building can reach one without having to pass a stair well or elevator shaft. Chain or endless ladder types of fire escapes may be used on buildings or parts of buildings, so constructed that the standard platform fire escape cannot be applied without obstructing window or door openings or without giving the ladder a pitch of more than 60 degrees. In such cases balconies of the standard type must be provided and the chain or endless ladder escape must be suspended over the middle of the space between tiers of windows. (3) The fire escape on each floor must be so located as to be readily accessible and unimpeded by fire from obstructions. In case access to an escape is had through a room, either the door of the room must be removed or an unobstructed passage at least two and one-half feet wide must be provided from the corridor or the hallway to the fire escape. Access to fire escapes may be had through windows in case the sill or sash of the window is at least six inches above the floor and the windows are so constructed as to provide a clear opening at least three feet high and two and one-half feet wide. In buildings where certain rooms are always rented on lease and affidavit is furnished to that effect, the entire suite will be considered as having proper access to the fire escape if an escape in its suite can be reached by a landing or drop ladder of fire escapes must be provided with a counter-balanced weight suspended in a bronze or copper cable capable of sustaining a weight of twelve hundred pounds. In all cases where chain or endless ladder fire escapes are used they must be so arranged that light at least and foot of escape flight of stairs. The wire for operating the escapes must be of non-corrosive metal at least one-fifth of an inch in diameter. Escapes must be so placed as to be readily accessible and unimpeded by fire from obstructions. In case access to an escape is had through a room, either the door of the room must be removed or an unobstructed passage at least two and one-half feet wide must be provided from the corridor or the hallway to the fire escape. Access to fire escapes may be had through windows in case the sill or sash of the window is at least six inches above the floor and the windows are so constructed as to provide a clear opening at least three feet high and two and one-half feet wide. In buildings where certain rooms are always rented on lease and affidavit is furnished to that effect, the entire suite will be considered as having proper access to the fire escape if an escape in its suite can be reached by a landing or drop ladder of fire escapes must be provided with a counter-balanced weight suspended in a bronze or copper cable capable of sustaining a weight of twelve hundred pounds. In all cases where chain or endless ladder fire escapes are used they must be so arranged that light at least and foot
